DHANUSH S

Frontend Developer(React)

PROFESSIONAL SUMMARY

Results-oriented front-end developer with a strong foundation in HTML, CSS, JavaScript, React.js and Chakra UI. Detail-oriented and efficient coder, adept at crafting seamless user experiences. Quick learner with a focus on incorporating emerging technologies. Collaborative team player committed to delivering high-quality, visually appealing web solutions.

PROJECTS

1. Weather-App | |

React.js | Chakra UI | HTML | CSS

- Developed a weather application using React.js and Chakra UI to provide accurate weather reports upon search.
- Implemented features including authentication, routing, and fetching data from APIs.
- Employed HTML and CSS for front-end development.
- Completed the project individually within a 3-day timeframe.

2. Nordstrom.com Clone | |

React.js | Chakra UI | HTML | CSS

- Developed a replica of the Nordstrom website from scratch
- Implemented slider functionality for smooth user experience
- Utilized React.js, Chakra UI, HTML, and CSS for front-end development
- Completed the project individually within a tight timeframe of 3 days

3. Naukri.com Clone | |

HTML5 | CSS3 | JavaScript

- Engineered an online job search application mimicking Naukri.com.
- Implemented using HTML5, CSS3, JS, and GIT.
- Completed as a solo project in just 3 days.
